

Rakboot™

Revolutionary New Product!

Uses the revolutionary *Raksok™ Fitting Sleeve.

*Raksok™ Patent Application No. 2004901252

Fitting Instructions using the Raksok™

1. Cut the old boot from the steering rack, if necessary trim the new Rakboot™ to size using the old boot as a guide for the size.

2. Fit Raksok™ over the complete tie rod end assembly.

3. Lubricate Raksok™ fitting sleeve with an engine oil, grease or similar type lubricant.

4. Lubricate the inside of the Rakboot™ paying particular attention to the smaller end of the Rakboot™.

5. Feed the Rakboot™ over the lubricated Raksok™.

6. Grip the Rakboot™ at the small end of the boot and continue to push the Rakboot™ over the entire tie rod end assembly using a slight twisting action.

7. Continue to move the Rakboot™ along the tie rod and into position. Remove and discard the used Raksok™.

8. Clamp both ends of the Rakboot™ using the supplied clamps, connect or plug the breather tube as required and then complete vehicle assembly.

Note: PTW recommends the breather tube be orientated to the top of the boot when it is not being used.

*Using the Raksok and Rakboot™ you can easily replace most steering rack boots without removing the tie rod ends. No wheel alignments are required, you save on labour time & there is no need to clean the tie rod ends as the Raksok™ keeps the inside of the Rakboot™ clean during the whole fitting process!

*Rakboot™ is manufactured using Micro Stretch Technology™ and is **Guaranteed** not to split!

*Raksok™ protects the Rakboot™ from damage & contaminants throughout the fitting process!

*The Raksok™ is a disposable fitting sleeve that is supplied free with every Rakboot™.

*Rakboot™ & Raksok™ make all other steering boots & fitting methods seem primitive and obsolete and fits most passenger vehicles in minutes with ease!

Manufactured in a certified QS-9000 facility.
